

Journey: Olympia - Athens, Athens – Isle of Man – almost in all England cities.

Caption: The Torch is made up of an inner and an outer aluminum alloy skin, held in place by a cast top piece and base, perforated by 8,000 circles. Representing the inspirational stories of the 8,000 Torchbearers who will carry the Olympic Flame, the circles which run the length of the body of the Torch also offer a unique level of transparency. You can see right to the heart of the Torch and view the burner system which will keep the Olympic Flame alive on its journey around the UK.
